

STUDENT CASE STUDY EXECUTION REPORT

Department	FED
Subject	DSA-2
Academic Year	1-3 Semester (2025-26)
Faculty Name	Mohammed Razia Alangir Banu
Student Name	D.Vignesh Kumar
Roll Number	2520090071
Branch	CSIT
Course Outcome	3

Case Study Topic: Wikipedia Hyperlink Graph – Six Degrees of Separation using Breadth First Search (BFS)

Word Done Summary:

In this case study, Breadth First Search (BFS) was used to analyse the concept of **Six Degrees of Separation** in a simplified Wikipedia hyperlink graph.

The graph consists of 8 Wikipedia articles:

Cricket
India
Mumbai
Sachin
Wankhede
Tendulkar
Bandra
MumbaiCit
y

The hyperlinks between articles are treated as **undirected edges**. The objective is to determine the **minimum hop-count (shortest path)** from the article "**Cricket**" to every other article. BFS was selected because it explores the graph level-by-level, guaranteeing the shortest path in an unweighted graph.

Implementation Details:

1. Graph creation using adjacency lists.
2. BFS traversal from Cricket.
3. Queue-based exploration.

4. Distance (hop count) calculation.
5. Display of shortest paths.
6. Analysis of the Six Degrees of Separation concept.

Result:

BFS Traversal Output-

Starting Article: Cricket

Cricket -> Distance 0

India -> Distance 1

Sachin -> Distance 1

Mumbai -> Distance 2

Tendulkar -> Distance 2

Wankhede -> Distance

2 Bandra -> Distance 3

MumbaiCity -> Distance 3

The BFS algorithm successfully determined the minimum hop-count from Cricket to all other Wikipedia articles. The level-by-level traversal ensured shortest path discovery and demonstrated the practical application of BFS in hyperlink networks. The case study also highlights the Six Degrees of Separation concept, showing how even large networks can maintain surprisingly short connection paths between nodes.

Output:

```
Starting Article: Cricket

Cricket -> Distance 0
Wankhede -> Distance 2
Mumbai -> Distance 2
Tendulkar -> Distance 2
Bandra -> Distance 3
MumbaiCity -> Distance 3
India -> Distance 1
Sachin -> Distance 1
```
